

Dustlok® Adhesive Advantage

The *only* filtration media adhesive that continuously renews its effectiveness throughout the life of the filter.

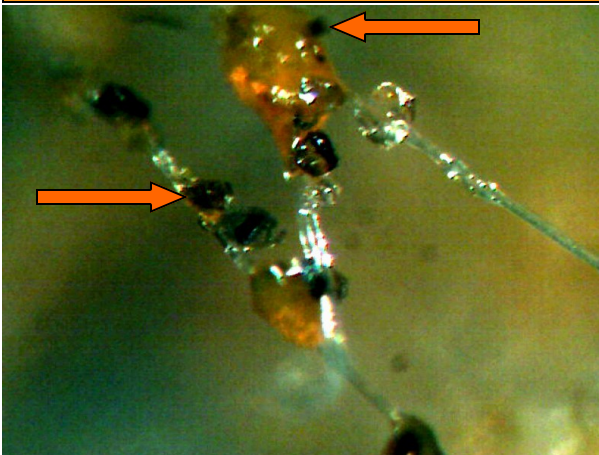

Traditional Adhesive - After 3 Days

Every Picture Tells A Story...

Picture #1

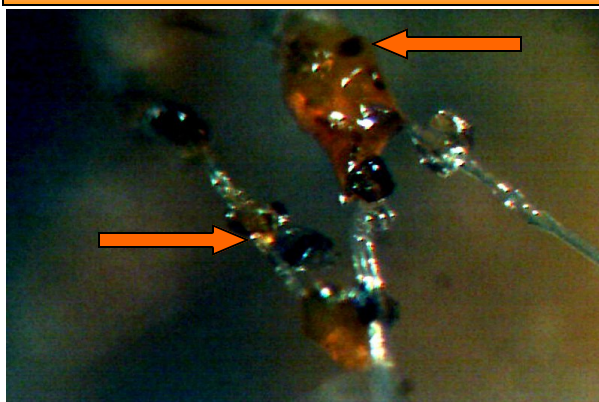

Traditional Adhesive: A particle is stopped by the adhesive, but remains on the fiber's surface. As particles attach, the adhesive does not renew its effectiveness, rendering that area of the fiber surface useless.

Dustlok Adhesive - Day 1

Picture #2

Day 1: Dustlok Adhesive captures a particle on the fiber's surface. The particle adheres to the adhesive, assuring it will not detach and enter the air stream.

Dustlok Adhesive - Day 3

Picture #3

Day 3: Dustlok Adhesive surrounds the particle, holding it securely in the filter media. The particle is encapsulated, allowing the adhesive to capture additional particulate and repeat the process.

The One & Only
**Dustlok® Adhesive Does Not Migrate
From Filter Media Into The Airstream**

Fiber Bond's technical staff was proactive in developing a test device and procedure that determined

**Dustlok® Adhesive
Does Not Migrate
Into The Airstream**

(Picture at left: Chemical analysis in progress)

Test Procedure Includes:

- Clean filter paper is placed downstream of the media that contains Dustlok Adhesive.
- The media is subjected to air velocities typically used in air handling systems.
- After completing the test, the filter paper is removed and analyzed. A **microscopy analysis** is conducted and involves looking for visual signs of adhesive migration. In addition, a **chemical analysis** is used to detect traces of the adhesive's chemical composition on the filter paper.

Testing Concludes...Dustlok Adhesive Does Not Migrate Into The Airstream

**The following Fiber Bond products contain Dustlok® Adhesive -
Available exclusively through Fiber Bond distributors:**

Panels/Links

- 2-Ply Gold
- 15/40 Xtra
- Invincible 500
- Dustlok 3-Ply
- Pleat Killer
- Poly Shield XI

Pleat

- Kleen Pleat Gold

Auto Rolls

- Dustlok Auto Rolls

Cube Filters

- Dustlok Cube
- 440 Cube
- 660 Cube
- Dustlok 30-HC
- 15/40 Xtra Cubes

Media

- Dustlok
- Dustlok Gold
- Poly Shield XI
