VE3 Technology Eliminates SARS-CoV-2 (COVID-19)

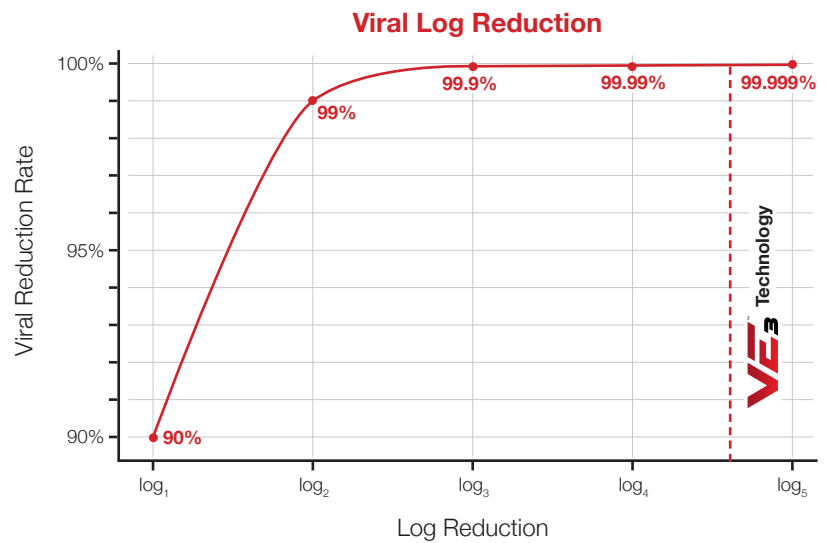

**Available in Select Premium Fiber Bond Products*

Providing clean and safe air has never been more important. COVID, flu, and other airborne viruses cause illness, employee absences, and shutdowns every year. Fiber Bond has a solution. Over 30 years of experience has allowed us to develop a chemistry that can be incorporated into filtration media that can help eliminate these dangerous virus particles. Our patent pending VE₃ technology has been independently lab tested by Microbac Laboratories, the global leader in SARS-CoV-2 (COVID-19 virus) testing with regulatory approved protocols. The test results demonstrate a 99.99% inactivation of the SARS-CoV-2 (COVID-19) virus particles captured in the filtration media that contains VE₃ technology. Fiber Bond's VE₃ is engineered to encapsulate and eliminate virus particles. VE₃ - Protect the air we share.

Independently Tested To Inactivate COVID-19

- VE₃ Technology inactivates > 99.99% of the SARS-CoV-2 (COVID-19) viral particles captured.
- VE₃ Technology demonstrated a log reduction of ≥ 4.66 within 15 minutes.
- Testing conducted by Microbac Laboratories, the global leader in SAR-CoV-2 (COVID-19) virus testing with regulatory approved protocols.
